EDUCATION

Toronto Metropolitan University, Toronto, ON Sep 2025 – Present
Bachelor of Engineering, Computer Engineering (Second Year)

- CGPA: 3.79 / 4.33 | Coursework: Java OOP (COE318), C Programming, Digital Systems (VHDL), Electronic Circuits, Physics

High School 2021 – 2025
Ontario Secondary School Diploma

- Honour Roll (Gr 9–11); subject awards in Automotive, Construction Tech and History; Arts Fest Photography Award

CERTIFICATIONS

CS50x: Introduction to Computer Science | Harvard University (edX) In progress

TECHNICAL SKILLS

Languages: C, Java, Lua, VHDL, HTML (learning), CSS (learning), JavaScript (learning), Python (learning)
Robotics & Systems: ROS 2, Docker, Linux (Ubuntu), Git/GitHub
Hardware & Tools: Quartus, MultiSIM, circuit analysis, VS Code, Geany, NetBeans
Design: UI design, Adobe Photoshop, Premiere Pro, Canva, photography, Figma

EXPERIENCE

Software Team Member | TMU Velocity (Autonomous Vehicles Design Team) 2026 – Present

- Completed software onboarding Labs 1 and 2 for the team's RoboRacer (F1TENTH) autonomous racing program in ROS 2 on Ubuntu, resolving ROS distribution and package conflicts along the way.
- Set up the RoboRacer simulator in Docker and wrote an emergency-braking safety node with AI assistance, then tested it in simulation.

Co-founder and CEO | Cloudform LLC 2021 – 2026

- Co-founded and led an independent game-development and early software company, owning product direction, project planning, branding and team coordination.
- Directed a Roblox game project (The Lost Jungle) through 11 delivered maps, coordinating scripters and freelance builders, modellers and animators.
- Designed and iterated the company website across 10+ versions, including division navigation and a mobile menu.

Produce Clerk | Metro Inc. Aug 2023 – Present

- Stock, rotate and organize the produce department, keeping displays full and customer-ready while working part-time alongside full-time engineering studies.

PROJECTS

Personal Portfolio Website | *HTML, CSS, JavaScript, Python, Cloudflare* 2026

- Built a six-page responsive portfolio (marcantoniopovolo.com) generated from a Python script and deployed from GitHub to Cloudflare; tested at 320–1440 px widths.

Markets by MP | *JavaScript, REST API, SVG, GitHub Pages* 2026

- AI-assisted installable web app that tracks TSX and US holdings in CAD with live US prices, USD/CAD conversion, a portfolio chart and allocation; works within free API limits and unit-tests the portfolio maths.

Java Engineering Labs (COE318) | *Java, NetBeans* 2026

- Implemented object-oriented programs with arithmetic, equality and reciprocal operations, verified against expected output.

LEADERSHIP & INVOLVEMENT

Communications Committee Member | Metropolitan Undergraduate Engineering Society (MUES) Sep 2026 – Present
Outreach Team Member | TMU MetRobotics Oct 2025 – May 2026
General Member | Engineers for a Sustainable World (ESW) TMU 2025 – Present
Retreat Leader, then Core Retreat Leader and Eco Team Lead | High School 2023 – 2025
High school community: Best Buddies, Domestic and International Outreach, Students 4 Action, Thanksgiving Food Drive, Multicultural Night
